Backend Web Developer
https://github.com/IgbeDean

PROFILE

Backend Web Developer with a B.Sc. in Computer Science and deep expertise in the Python ecosystem (Django, Flask). Adept at structuring complex database models, optimizing PostgreSQL queries, and deploying secure authentication and identity management systems. Combines rigorous backend engineering with efficient version-controlled workflows.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), HTML5, CSS3.
- **Backend & APIs:** Django (ORM, Signals, Managers), Flask, RESTful APIs.
- **Databases & Storage:** PostgreSQL, SQLite, Database Indexing & Optimization.
- **Tools & DevOps:** Git, GitHub, Linux/Bash, OAuth 2.0, Unit Testing.

CORE PROJECTS

[DeanExchange] | Dual-Sided Peer-to-Peer Marketplace

Tech Stack: Python, Django, PostgreSQL, JavaScript, WebSockets, REST APIs

- Architected a full-stack dual-sided marketplace platform featuring custom permission structures and isolated dashboard workflows for buyers and sellers.
- Engineered a robust transaction tracking system in PostgreSQL, utilizing database transactions (ACID compliance) to safely process peer-to-peer exchanges and manage multi-state order life cycles.
- Developed a high-performance media handling pipeline, leveraging cryptographic hashing for filename standardization and background cleanup routines to purge orphan files.
- Built an asynchronous JavaScript SPA layout router to manage background interface state and push instantaneous UI updates across decoupled layout blocks without full-page reloads.

[DIOP Identity Engine] | Secure User Authentication & Management

Tech Stack: Python, Django, PostgreSQL, OAuth 2.0, Vanilla CSS/JS

- Developed a secure identity management backend featuring custom user models, role-based access control, and seamless Google OAuth 2.0 integration.
- Hardened system security by implementing multi-tier identity verification, token-based email confirmations, and administrative hooks.
- Optimized database indexing and query performance in PostgreSQL to support rapid authentication lookups and secure session handling

EXPERIENCE

06/2025 – 04/2026

Assistant Secretary (NYSC), Imo State Government House – Owerri, Imo State

- Coordinated administrative workflows for the Office of the Deputy Chief of Staff (General Services), ensuring a 20% increase in daily document processing efficiency.
- Managed high-level official correspondence and internal memos, maintaining strict confidentiality and accuracy for government records.
- Assisted in the planning and logistical execution of state-level meetings and official functions, ensuring all protocol requirements were met.

05/2023 – 10/2023

Software Developer Intern, MRSoft Technology Complex – Port Harcourt, Rivers State

- Collaborated on developing responsive web applications, contributing to both front-end components and back-end logic.
- Optimized existing codebases and debugged backend performance bottlenecks during application testing phases.
- Participated in agile sprint cycles and code reviews, ensuring technical deliverables met project deadlines.

EDUCATION

B.Sc. in Computer Science with Second-Class Upper | University of Nigeria, Nsukka

Nsukka, Enugu State — Graduated 03/2024

Certificate of National Service (NYSC) | National Youth Service Corps

Owerri, Imo State — Completed 03/2026

Completed Secondary School (WAEC) | Bishop Okoye Spiritan Secondary School

Oyigbo, Rivers State — Completed 2019

Completed Primary School | The Jewels

Port Harcourt, Rivers State — Completed 03/2013
